Updating the Events Page

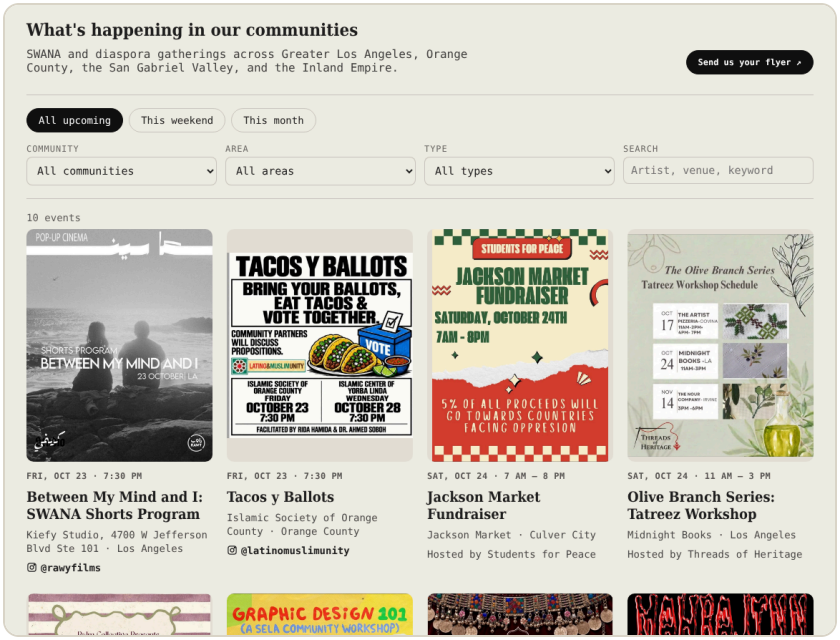

How to add flyers to diasporapeoplesplace.org/events from here on. You never touch Squarespace again: flyers go to Claude, Claude posts them, and the page updates itself.

1. Flyers
Save them to the month's Drive folder or send them in a chat.

2. Claude
Reads each flyer, writes the listing, crops and names the image.

3. GitHub
Claude posts the listing and flyer to the dpp-events repository.

4. Website
The Events page shows the new flyers within about 10 minutes.

The Events page as visitors see it. Tapping a flyer opens its details, tickets, and the host's Instagram.

Past events disappear from the page on their own the day after they end. There is nothing to clean up.

The weekly routine

1 Collect the flyers

Save each flyer to the Drive folder for its month, such as **November Events**. Use the original flyer image when you can get it. Phone screenshots work too, since Claude trims the phone edges, but the original always looks sharper.

Name files with the date first, like `11.14_Armenia Market.jpeg`. If one flyer covers several dates, use the first date.

2 **Start a new chat with Claude and paste the request**

Copy the request in "The request to paste" below, fill in the folder name, and send it. You can also attach the flyers directly to the chat instead of pointing to a folder.

3 **Answer Claude's questions**

When it's done, Claude lists what it added and anything it couldn't confirm, usually a missing Instagram handle, a flyer with no location, or a date that doesn't match the file name. Reply with what you know, or say "leave it as is."

4 **Check the page**

About 10 minutes later, open **diasporapeoplesplace.org/events** in a private window and look for the new flyers. A private window matters because a regular one may show you an older saved copy.

The request to paste

A new chat doesn't remember this setup, so this request gives Claude everything it needs. Change the part in brackets.

```
Please add new flyers to the Diaspora Peoples Place events page.

The flyers are in my Google Drive folder "[November Events]". Only add ones that aren't
already listed.

The listings live in GitHub at diasporapeoplesplace/dpp-events: events.json holds the
listings and flyers/ holds the images. Add the repository to this session and push your
changes to main.

House rules:
- Use only details printed on the flyer. Don't add times, prices, or addresses from other
websites.
- If the flyer has no location, write "Contact organizer for location". If it has no time,
leave the time blank.
- Trim phone-screenshot edges and name each image YYYY-MM-DD_short-name.jpg (lowercase,
dashes, no spaces).
- Add the host's Instagram only if you can confirm it.
- Keep every event unless I say otherwise.
- If two flyers are the same event, make one listing.

When you're done, tell me what you added and anything you couldn't confirm.
```

Changing or removing a listing

Just tell Claude in plain words, mentioning the repository so it knows where to look. For example:

- "In diasporapeoplesplace/dpp-events, the Kite Day organizer's Instagram is @example. Please add it."
- "The Festival of Resistance now starts at 2 PM. Please update the listing."
- "Seeds for Liberation was canceled. Please remove it."

Corrections follow the same rule as new listings: if it's on the flyer or you say it, it goes in.

If something looks wrong

What you see	What to do
New flyers aren't showing	Wait 10 minutes, then check in a private window. If they're still missing, ask Claude to confirm its changes were pushed to main.
A grey box where a flyer should be	The image name in the listing doesn't match the file. Tell Claude which event it is.
"Events are taking a moment to load"	Open **diasporapeoplesplace.github.io/dpp-events/events.json**. If you get an error, a recent edit broke the file. Ask Claude to check events.json and fix it.
Claude says it can't reach GitHub	In Claude, go to **Settings → Connectors → GitHub** and make sure the Claude GitHub App shows **Installed** for diasporapeoplesplace.

Without Claude: editing on GitHub

Any volunteer with the DPP GitHub login can add a listing by hand.

Upload the flyer

Go to **github.com/diasporapeoplesplace/dpp-events**, open the **flyers** folder, click **Add file → Upload files**, add the image (named like `2026-11-14_armenia-jpg-market.jpg`), and click **Commit changes**.

Add the listing

Open **events.json** and click the pencil icon. Copy an existing listing, everything from its `{` to its `},`, paste it below, and change the details. Then click **Commit changes**.

```
{
  "name": "Diaspora Fall Market",
  "date": "2026-10-24",
  "start": "12:00 PM",
  "end": "4:00 PM",
  "venue": "Holy Ground",
  "area": "Los Angeles",
  "community": "Pan-diaspora",
  "type": "Market & pop-up",
  "desc": "A coffee pop-up, curated vendors, and community gathering.",
  "host": "Palm Collective",
  "instagram": "palmcollective.la",
  "flyer": "2026-10-24_palm-fall-market.jpg"
},
```

> Every listing ends with `},` except the very last one, which ends with `}`. A missing or extra comma stops the whole page from loading, so if the page breaks after an edit, check the commas first.

Fields you can use

Field	What goes in it
date / until	Year-month-day, like 2026-11-14. Add "until" only for multi-day events.
start / end	Like "7:30 PM". Leave start as "" if the flyer has no time.
community / type	Comma-separated. These build the page's filters, so reuse existing words, like Palestinian, Workshop, or Market & pop-up.
price / note	Optional, like "Free" or "RSVP required".
instagram	The handle without the @.
link	Optional tickets or RSVP page, starting with https://.

Where everything lives

Events page	diasporapeoplesplace.org/events
Listings and flyers	github.com/diasporapeoplesplace/dpp-events
Live listings file	diasporapeoplesplace.github.io/dpp-events/events.json
Flyer inbox	Google Drive: October Events, November Events, and so on
Squarespace code	Saved in the repository as embed-code.html. It's already on the page and only needs pasting again if the page is ever rebuilt.
